M7100 *Terminal Accessories*

AML American Microsystems, Ltd.

AML's quality accessories make your work experience more efficient and productive. AML offers a full range of M7100 terminal accessories to complement your data collection application and work environment – from single user, to enterprise-wide installations.

Single Slot Charging & Communications Cradle

AML's single slot charging and communications cradle enables serial or USB (slave) communication between the M7100 and a host PC. The cradle charges the M7100 terminal battery and includes an extra slot for charging a spare battery. Dual color LED lights indicate when the terminal and spare battery are fully charged. The cradle accommodates the M7100 with or without the optional M7100 pistol grip handle. Includes external power-pack and line cord. (Part number: ACC-7025)

Four Position Terminal Charger

The four position terminal charger for the M7100 will simultaneously charge the internal batteries in four (4) M7100 terminals. Typical charge time is 4 hours. Dual color LED's provide charging status. One position of the charger also accommodates communications to the M7100 utilizing "pass through" RS-232 and USB ports. The four position charger is enclosed in a rugged metal housing and comes complete with external power-pack and line cord. (Part Number: ACC-7035)

Four Position Battery Charger

The four position battery charger for the M7100 terminal will simultaneously charge four (4) M7100 batteries. Typical charge time is under 2 hours (half the time of the standard charger). Dual color LED's provide charging status. Featuring a rugged metal housing for added durability, the four position battery charger comes complete with external power supply and line cord. (Part Number: ACC-7037)

Vehicle Mount Terminal Charger

AML's forklift or vehicle mount terminal charger charges the internal 7.8V Li-Ion battery of the M7100 terminal, and holds the M7100 securely for use or transit in a forklift or other vehicle. A 9-pin RS-232 port is provided for connection of an external serial device such as a tethered bar code reader or a serial printer. An optional output of 5V DC at 1 Amp is available, primarily for powering a device such as a tethered bar code reader. The vehicle mount terminal charger supports DC input voltages ranging from 9VDC to 54VDC. (Part Number: ACC-7036)

Vehicle Mount Cradle (Non-charging)

The AML vehicle mount cradle secures the M7100 terminal for use or transit in a forklift or other vehicle. Constructed of powder coated steel for durability, the cradle is fully adjustable and can be dash mounted. The vehicle mount cradle allows easy access to the terminal keypad and accommodates the M7100 with or without the optional M7100 pistol grip handle. (Part Number: ACC-7038)

Multiple Holsters

(Part Number: CAS-7102B)

(Part Number: CAS-7101B)

Holster with Belt
AML's nylon holster, with adjustable belt, secures the M7100 terminal comfortably on the user's hip for easy terminal accessibility. The holster provides added protection for the M7100 terminal and accommodates M7100 terminals with or without the optional pistol grip handle. (Part Number: CAS-7101B)

Holster with Shoulder Strap
This functional nylon holster comes with an adjustable shoulder strap and a clear plastic cover to protect the terminal keypad and LCD display. *(Part Number: CAS-7102B)*

Pistol Grip Handle

The M7100 pistol grip handle is designed to accommodate users who prefer the point and shoot style of scanning. Installation is quick and easy. The pistol grip handle secures to the M7100 terminal with four screws and the battery is then relocated inside the pistol grip handle for easy change-out. *(Part Number: ACC-7HND)*

Protective Rubber Boot

This custom molded rubber boot slips easily over the M7100 and tightly conforms to the terminal while still allowing full operator access to the keypad and LCD display. The boot provides protection to the M7100 from damage, in the event the terminal is inadvertently dropped. The initial configuration of the protective boot also provides an IP54 rating to the M7100 terminal for added protection from harsh environments. Optionally, the boot can be modified in the field to accommodate the M7100 pistol grip option and/or easy access to the battery door. The boot can also be modified to provide access to the IrDA, serial, or USB ports. *(Part Number: CAS-7100RB)*

AML Support Agreements

For those customers who want the peace of mind that comes from guaranteed turnaround on warranty repairs, AML offers Extended Warranty, Extended Warranty Plus, and CARE Plan Extended Warranty (Critical Advanced Response Exchange) support agreements.

AML Extended Warranty

The AML Extended Warranty may be purchased for eligible products anytime during the term of the standard limited warranty. The Extended Warranty replaces the standard limited warranty, and provides the following added benefits:

· Additional warranty term, depending on the product
· Covers failures as a result of normal wear and tear*
· Covers firmware upgrades
· Four (4) business day turnaround, excluding time in transit
· No RMA number required
· Standard return freight (UPS Ground included)

AML Extended Warranty Plus

The Extended Warranty Plus provides all the coverage of the Extended Warranty, with additional coverage for the failure of external components regardless of fault. Generally this includes the case, LCD displays, keypads, overlays, lenses, and exposed connectors*. The Extended Warranty Plus is available for select AML products and replaces the standard limited warranty.

AML CARE Plan Extended Warranty

AML's CARE Plan (Critical Advanced Response Exchange) provides added security to those customers with mission critical requirements that demand next-business day response. The CARE Plan includes all the coverage of the Extended Warranty Plus, in addition to providing for an advance replacement unit shipped overnight upon request.

AML Maintenance Agreements

AML also offers Maintenance Agreements for select AML products no longer under warranty. For more information about AML maintenance agreements and the products that are covered, call 1-800-648-4452 or visit www.amltd.com.
