Epson
PT-6000
Platform Manager

PT-6000 3-piece platform manager

- Provides a "factory fit" of your Epson printer on IBM 4690 or SurePOS 700 series POS systems
- Fits Epson TM-U675, TM-H6000 and TM-H6000II printer models
- Convenient center tray
- Fast and easy installation

With the PT-6000 platform manager, it's easier than ever to drop an Epson printer into your IBM POS system. And, while an Epson printer improves your overall system performance, the PT-6000 improves its appearance.

This simply designed tray system installs in seconds and fits snugly atop IBM 4690 or IBM SurePOS 700 series POS systems.

A place for everything

When you want the most from your IBM POS system, you partner it with an Epson printer. And when you want the perfect place to put it, you choose Epson's durable PT-6000 platform manager. This easy-to-install system not only offers a secure place for your Epson printer, it maximizes the use of space atop your system's CPU. The convenient center tray can be used to store small items, receipts and notes in plain sight at the point-of-sale, to be easily remembered and retrieved.

The right printer, the right fit

The PT-6000 platform manager is designed to securely accommodate an Epson TM-U675, TM-H6000 or TM-H6000II and a pole display if needed. The two trays just snap into place, requiring no special tools or extra hardware. The pole display mount attaches easily with screws. And, all your system cables remain easily accessible. With the PT-6000 platform manager, Epson printers and IBM POS systems are now, more than ever, exactly the right fit.

IBM system and Epson printer mounted in the PT-6000 platform manager
