full-size scanner/scale

MS2300 Series **StratosH™**

Metrologic's StratosH 6-sided, 360°-bioptic scanner/scale provides retailers with high-throughput efficiency and aggressive first-pass scanning performance. Its patented modular independent scanning planes simplify set up, minimize downtime and maximize customer satisfaction.

StratosH ensures checkout efficiency with Stratos**SYNC** and Stratos**SWAP**. Both features capitalize on Metrologic's patented modular scanner configuration of independent vertical and horizontal scanning planes.

The StratosH form factor is available in several lengths and boasts a 4-inch-below counter depth for easy integration into most checkout environments.

The high performance of the Stratos series has been united with the legendary accuracy and ruggedness of the Mettler Toledo dual interval scale.

Specifically designed to withstand the most grueling checkout environments, the DIVA dual interval scale supports both weight-only and price-computing applications. This allows international retailers to easily create global standards for their POS systems.

StratosH also features RS-232 auxiliary port, Flash ROM firmware upgrade capability, MetroSet@2 PC-based configuring and sapphire or diamonex horizontal window.
