

Collaboration Room Endpoints /

Cisco Webex Board

All-in-one device for team collaboration

With the Cisco Spark Board, you can wirelessly present, white board, and video or audio conference - everything you need for team collaboration, all at the touch of a finger. And you can use the Cisco Spark app to connect to your virtual teams outside the physical room, through the devices of your choice.

Features

Designed with you in mind

Enjoy an easy-to-use, touch-based, high-quality collaboration experience on Cisco Spark Board. It integrates the most common tools needed for team collaboration in physical meeting rooms into a single elegant device.

Connects virtual teams through the app

Everything you create on the Cisco Spark Board can be stored in the cloud and associated with a virtual room. Team members can use the Cisco Spark app to pick up where they left off in the physical room and continue working anywhere.

Intelligently anticipates your needs

The Cisco Spark Board automatically wakes up when you enter the room. It detects your Cisco Spark app-supported device and suggests an activity, such as call, whiteboard, or wirelessly share your presentation.

Technology for natural experiences

A powerful 4K camera captures a high-resolution, wide-angle image of virtually the entire room. A 12-microphone array delivers crisp, clear audio, automatically amplifying and modulating voices so that all meeting participants sound great.

Cisco Spark Board Access Plan

The Cisco Spark Board Access Plan gives you an easy way to acquire the Cisco Spark Board as a service--for hardware, software, and support--through a predictable monthly payment plan.
