

# SMART SOLUTIONS FOR THE LABELING INDUSTRY

## EASY LABEL DISPENSER

model **SED02**

The easy dispenser will assure you the maximum flexibility and the best efficiency/price ratio making it easy for you to apply labels in your semi-automatic manual labeling operations.

Two buttons will allow you to choose between a manual detachment of the label, that means to push the button when you want the label to be detached, or an automatic detachment, that means to take the labels automatically in succession.

Through a knob you can set the label's length to detach, from 0.19" (5mm) up to 7.08" (180mm).

All the dispensers have a top to write on the label before detachment and are equipped with an external auto-switching 100/240VAC - 2.5A at 24V power supply and an electronic circuit controls the functions with a protection 2A fuse.

model **BED01**

Not just labels
