I-Series 2.0 for Android

All-in-One Touchscreen Signage

Integrated Touch

Commercial Grade

2-Year Warranty

Product Overview

Elo's newly upgraded I-Series 2.0 for Android™ combines commercial-grade reliability with the powerful Android Qualcomm® Snapdragon™ processor. Delivering 2X the performance of its predecessor, the I-Series 2.0 brings it all with an integrated TouchPro® PCAP 10-touch display, Android 7.1 (Nougat) and optional Power-over-Ethernet (POE) – all in a compact responsive AiO computer. Available in white and black, the AiO offers a variety of mounting options with the flexibility needed to survive the rigors of continuous public use for in-store interaction, point of sale, self-service, wayfinding, corporate and hospitality environments.

Combine the I-Series with Elo's cloud-based management software, EloView® designed to simplify and automate deployment of Elo interactive displays across the globe. EloView, a software-as-a-service (SaaS) platform, includes OS management (including remote and silent updates), kiosk lock-down, automatic provisioning and device management. The platform also offers virtual GPS capabilities enabling a location to be set (latitude/longitude) remotely for each device, so that content may be localized per device or across all locations.

Available in 10", 15" or 22" widescreen sizes with high-performance computing and sleek edge-to-edge glass PCAP touchscreen

Power-over-Ethernet and Virtual GPS enable flexible installations and customized content delivery via applications

Optimize deployments with cloud-based configuration, monitoring and scheduling

Modern design with flexible mounting in portrait, landscape and table-top orientation
