

PM550

RUGGED ANDROID HANDHELD POWERED FOR THE WAREHOUSE

Align your enterprise mobility platforms with Android

Android has become the operating system of choice for rugged handheld terminals even in the warehouse. Leading this shift is PM550 with Android Nougat 7.1, including enterprise-tuned features such as the Enterprise Mobility Kit (EmKit) - a customized kit designed precisely for the enterprise mobility market that makes out-of-the-box deployment extremely fast and painless.

A new 4.3-inch display, all with more power

Run whatever tasks you need on the new 4.3-inch touch screen with maximized visibility, which feels even bigger with no virtual keypad popping up to disturb your view. We put the removable 6,300mAh battery in the gun handle for perfect weight balance and easy operation - the combination to enhance the productivity of your workforce.

Unshakable reliability even in the harshest conditions

We know how tough your workplaces can get for your handheld devices, and not all survive. PM550 is a heavy-duty mobile terminal with a MIL-STD -810G for 1.5 m (5.0ft) drop resistance and has an IP65 rating, which means it is impenetrable to water and dust, can survive numerous drops, dramatic temperatures, and more extreme conditions. The double-molded bumper on every edge of the device along with a Gorilla Glass 3 touch screen makes PM550 the handheld you can count on.

Scanning performance that focuses on what's important

The standard range 1D/2D imager reads all GS1 symbologies as well as poorly printed barcodes. The extra long imager option lets you scan barcodes from a distance of up to 11 meters. As a new scanning solution, the PM550 supports Extended Wedge, a feature with enables selective modification of a decoded value.

Scan2Stage PC tool for provisioning Point Mobile
Android devices. With Scan2Stage, IT
administrator can prepare the settings of
the device and make QR code for
Scan2Set.
Power Launcher Kiosk mode with system restriction
allows admin to restrict operator's
access to system settings, MTP
connection and screen capture.
Direct Clone Solution for restoring the devices to the
same settings with no internet
connection. With Direct Clone, a Master
PDA becomes a hotspot server and
sends its backup file to nearby client
devices to clone the settings.
