Flexible. Powerful. Elegant

The XT4015 brings space-saving design to the Posiflex family with a terminal that folds and configures to an optimal angle, height and space, with the option of upgrading to a PoweredUSB base for reduced cable clutter or an 8-port USB hub. The multifunctional base can house the terminal power brick, and the PoweredUSB option eliminates the need for external adapters on peripherals. The low-profile design fits in the tightest of spaces, reducing shipping costs up to 40%.

With this sleekly designed exterior comes the power needed to run and secure most applications for hospitality, retail, health care and more. XT4015 offers a choice of three powerful Intel® processors, the G540, 2.5 GHz; Core i3-3220, 3.3 GHz; or the Core i5-3550s, 3.7 GHz to give you the choice of the price / performance you require.

The XT4015's bezel-free projected capacitive touch screen terminal comes standard with 4GB DDR3 RAM, and can be upgraded up to 16GB. Along with a rich array of connectivity features is the option for a mini-PCIe slot for WiFi and a VESA wall-mount bracket.
