bematech

Features

- Reliable performance
- Sturdy design and easy operation
- 5-Wire resistive touch panel
- Automatic brightness control
- Positive locking tilt angles
- High contrast with 500:1 ratio
- Built-in universal power supply
- Built-in speakers
- USB interface
- VESA mount
- Available in 15" and 17"

LE1000

Smart Touch Monitor

The 15" LE1000 touch monitor is built to meet the requirements that leading retailers and restaurant operators need from their POS system. With the 5-wire resistive touch panel, a high 500:1 contrast ratio and XGA 1024 x 768 resolution, the screen offers clear visibility for easy and efficient operations.

In many applications such as point-of-sale, the touch screen is constantly being used interactively. Such demanding use requires a highly rugged and stable touch screen monitor. The LE1000 includes a solid base and a locking tilt mechanism so that the angle of the touch screen does not change with usage. The LE1000 also includes special multimedia functionality with built-in speakers for computer-based training, plus many other important features that operators will value.

Focusing on a quick and significant return on investment is important in every industry, and when margins are tight, it's even more of a strategic imperative. Recognizing that this is an important goal for most end users, Bematech has priced the LE1000 touch screen to be cost effective for end users, resellers and system integrators. Moreover, the quality of the product also means that long-term cost-of-ownership will be very low.
