IntelliTrack

Collect. Track. Manage.

IntelliTrack
DMS Lite

DMS Lite
provides all the benefits of IntelliTrack Data Management Software for half the cost. Designed for smaller inventories, IntelliTrack DMS Lite version software limits the number of items you're able to keep inventory at a given time.

DMS Lite comes ready to use with all the same features and reports as IntelliTrack's full version DMS software. Its only limitation is the number of items inventoried at once. When an inventory limit is reached you can easily upgrade to the full version of DMS for an unlimited number of inventory items.

Inventory Lite

IntelliTrack Inventory software is designed to automate the physical inventory process through the use of bar code technology. Inventory functions are available to handle everything from routine physical inventories to managing a perpetual inventory providing for the collection and storage of user ID, Inventory, locations and quantities.

Inventory Lite tracks up to 100 inventory items.

Stockroom Lite

IntelliTrack Stockroom software is designed to consumable inventory through the use of barcode technology Stockroom functions are available to handle issues from inventory, receipt into inventory and routine physical inventories, to managing a perpetual inventory. It provides for the collection and storage of user ID, inventory, locations, and quantities.

Stockroom Lite tracks up to 100 consumable inventory items.

Fixed Assets Lite

IntelliTrack Fixed Assets software is designed to manage assets through the use of barcode technology. Fixed Assets provide for the collection and storage of user ID, asset number, Inventory, location, status and even manufacturer, model and serial number if required. Added features of Fixed Assets include:
- Asset/Item ID receiving
- RFID Add on is available

Fixed Assets Lite tracks up to 500 assets.

Check In-Out Lite

IntelliTrack Check In-Out software is designed to manage rotational inventory through the use of barcode technology. Functions are available to handle everything from routine physical inventories to managing a perpetual inventory and tracking items checked out to employees and/or customers. It provides for the collection and storage of user ID, both consumable and checkout items, locations, and quantities.

Added features of Check In-Out include:
- Maintenance and Calibration
- Reservations
- Cost Tracking
- Item ID Kitting
- Item ID Receiving

Check In-Out Lite tracks up to 500 assets and 100 inventory items.
