

Elo Touch Solutions for Healthcare

Elo Touch Solutions offers a product portfolio to deliver new and innovative touch solutions for Healthcare.

Elo touchscreens, touchcomputers, and interactive digital signs are designed to help deliver patient-centric services such as clinical workflow, entertainment, consultation, electronic medical records, and more. Elo's intuitive touch technology delivers a large display to engage, inform and improve the patient experience beyond a typical hand-held mobile device whether you are using your finger, a stylus, or wearing a rubber glove. Elo's healthcare products are built to comply with technical standards for the safety, essential performance and effectiveness of medical electrical equipment.

A drip-proof, easy-to-clean screen offers protection from fluids, leaks, and spills with wide-screen or standard aspect ratio displays ranging in size from 7-70 inches. Since Elo founders pioneered the touchscreen over 40 years ago, the Elo touch experience has consistently stood for quality, reliability and innovation.

Elo's newest M-Series VuPoint™ touchcomputer delivers functional industrial design, zero-bezel touchscreen, and integrated communications and computing purpose-built for healthcare environments.

The slim, light-weight touchcomputer has built-in handles to easily move the unit while attached to a mobile cart, swing arm, over a bed, or alongside a treatment chair.
