How to find the right size filter for your device.

Follow these instructions to select the right size filter for your device.

Step 1: Determine your screen type

Raised bezel: Screen with a raised frame

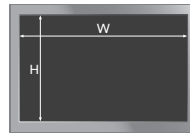

OR

Flat front glass screen: Edge-to-edge glass screen without a raised frame

Step 2: Measure your screen

For a raised bezel screen, measure the height (h) and width (w) of the screen's viewable area within the bezel.

OR

For a flat front glass screen, measure the height (h) and width (w) of the entire glass display.

Step 3: Find your filter

Best fit tips:

- Don't see a product that matches your measurements? Select one that is *smaller*, yet closest to your measurements.
- Buying a 3M™ Framed Black Privacy Filter for monitors? Select one that is *larger*, yet closest to your measurements.
- Buying for an Apple® device? Select a custom-fit product that matches your Apple model, size and display type.
