IntelliTrack® *Software*

IntelliTrack® DMS
Data Management Software

IntelliTrack® DMS Software

IntelliTrack® data management software is designed to maintain inventory in a variety of business environments. This user-friendly inventory tracking system combines state-of-the-art bar code data collection on your portable data terminal, with a sophisticated Windows®-based inventory management program for your PC.

With four specialized software applications, the IntelliTrack® product line is designed to custom fit your operation. Choose the software that works best for you – Inventory, Fixed Assets, Stockroom, or Check In-Out.

IntelliTrack's suite of products offers a relational database to ensure data integrity, portable bar code reader integration to maximize data collection efficiency, and bar code label printing capabilities to improve data collection accuracy.

IntelliTrack® was created using Microsoft® Access XP. Each IntelliTrack® software contains the source code and, since Microsoft® Access is one of the most popular development tools, you can easily customize your IntelliTrack® software to meet your specific requirements.

Portable Data Collection: Each IntelliTrack® software includes an integrated portable data collection application. Portable data collection applications allow you to perform many of the same functions found in the IntelliTrack® application for your PC, such as physical inventories, moving and tracking items, shipping or receiving orders, and more.

Embedded Graphics: Each IntelliTrack® product allows you to store a picture with an item definition. This feature allows a user to verify an item visually. This is especially helpful, for example, when a user might be checking out an unusual tool, verifying an asset, or identifying kits.

Customization: While IntelliTrack® will meet most users' requirements, situations may arise when you need to add features to IntelliTrack®. Since the IntelliTrack® source code is included with each product, you can make customizations such as adding a new report or even adding new forms with special processing capabilities. For additional programming expertise, or just to save time, call the IntelliTrack® Software Services Group.

Bar Code Printing: Integrated bar code printing allows you to label your inventory and locations quickly and easily based on the data contained in your IntelliTrack® application. Portable terminal support and bar code label printing maximize data accuracy and efficiency when collecting inventory information.

Easy to Use: IntelliTrack® is a user-friendly Windows application. Easy menu navigation allows you to quickly perform common inventory tasks.

IntelliTrack® DMS
Data Management Software

Available in 4 DMS Applications:

- *Inventory* allows companies to automate their physical inventory counts.

- *Fixed Assets* is designed track and maintain fixed assets.

- *Stockroom* is designed to track consumable items stored within a small to medium-sized stockrooms.

Specifications

IntelliTrack DMS
### *Data Management Software*

INVENTORY

Ideal for small to mid-sized environments, IntelliTrack® Inventory software effectively maintains your inventory with physical inventory and cycle counting capabilities. Powerful utilities, such as a move and edit feature, allow you to keep up with the demanding pace of a warehouse environment. Use the built-in reports and queries to monitor and manage your inventory.

IntelliTrack® Inventory comes with these standard reports:

|	
-History by Date	-History by Item
-Inventory by Location	-Inventory by Lots/Expiration Dates
-Inventory Item Summary	-Inventory with Pictures
-Overstock Summary	-Reconciliation
-Inventory by Category	-Inventory, Negative Quantity
-Inventory Item Detail	-Reorder

STOCKROOM

Manage consumable inventories with IntelliTrack® Stockroom software. Stockroom allows you to issue and receive items to and from individual employees and departments, giving you the ability to track item usage and billing information. Use the powerful usage and billing reports to identify inventory trends, giving you better capabilities to manage your inventory.

IntelliTrack® Stockroom comes with these standard reports:

-History by Item	-Inventory by Category
-Inventory by Location	-Inventory Item Summary
-Inventory with Pictures	-Inventory, Negative Quantity
-Issue Transactions	-Overstock Summary
-Receipt Transactions	-Reconciliation
-Inventory Item Detail	-Inventory by Lots/Expiration Dates
-Issue Number	-Reorder
-ReceiptNumber	

FIXED ASSETS

Use IntelliTrack® Fixed Assets software to track and monitor the location of your company's fixed assets. IntelliTrack®'s Fixed Assets software also has the ability to maintain depreciation data for individual assets. Fixed Assets tells you not only where an asset is, but how much it is currently worth.

IntelliTrack® Fixed Assets comes with these standard reports:

-Move Transaction by Asset	-Assets Not Inventoried
-History by Asset Number	-History by Date
-Inventory by Item & Pictures	-Inventory by Category
-Inventory by Item Number	-Inventory by Ownership
-Inventory by Site/Location	-Class Definition
-Assets by Alternate Part Number	-Assets without Item Definition
-New Assets	-Inventory by Serial Number
-Inventory by Asset Number/Detail	-Depreciation by Asset
-Inventory by Department	

CHECK IN-OUT

The IntelliTrack® Check In-Out software manages material and equipment check-in and check-out transactions, and manages your consumable stock. Great for internal libraries, audio/video departments, tool cribs and document rooms. Check In/Out is a powerful tool to manage circulating inventories.

IntelliTrack® Check In-Out comes with these standard reports:

-Check In-Out … Inventory Details	-Check In-Out … Inventory Summary
-History by Date	-History by Item
-Inventory by Location	-Inventory by Lot/Expiration Date
-Inventory Summary	-Inventory with Pictures
-Issue Number	-Issue Transaction
-Receipt Number	-ReceiptTransactions
-Rental Billing Report by Transaction Number	-Rental Cost by Employee
-Rental Cost by Department	-Usage by Check Out Item
-Retired Items	-Reconciliation
-Check In-Out … Past Due	-Rental Cost by Account
-Inventory, Negative Quantity	-Rental Cost by Order
-Inventory by Category	-Usage by Item Number
-Inventory Item Detail	-Overstock Summary
