

MAGNUSTOUCH **XV-2** SERIES

fully loaded

The Magnus is designed to give users the power and features that no other systems can match. It is the most powerful system available in the market, running Intel P4, upto 3GHz, with a blazing 100/1G BaseT network built-in. In addition, Magnus offers affordable RAID-1 capability for data redundancy and protection. By utilizing 2 hard drives, your data will be continuously duplicated onto the second drive. If one drive fails, Magnus will automatically run from the second drive, and reduce downtime.

Wall-mounted

Processor	Celeron 2GHz+, or P4 2GHz+, or P4 3GHz+
Bus	533 / 800 MHz
Display	15" TFT(1024x768), 17" TFT (1280x1024)
