

Supra

The World's Best-Selling Headset Thanks to Superior Sound Quality and Unsurpassed Comfort

Plantronics headsets have become the world's talking point, with more than six million in use today. The Supra® headset owes its popularity to the fact that it combines light weight with superior sound quality and outstanding comfort. A fully adjustable headband design provides good stability, while a soft ear cushion not only gives optimum comfort but also helps buffer distracting background noise.

Supra Monaural headsets, with sound in one ear, are lightweight and are ideal for users who may need to confer with colleagues when making or taking a call. For environments where users really need to concentrate on the call, there is a Binaural version, which gives greater clarity by providing sound in both ears.

The Supra Monaural and Binaural Noise-Cancelling models have all the features of the standard Supra headsets, but use a unidirectional, noise-cancelling microphone mounted on a highly flexible stem in place of the voice tube. By eliminating up to 75% of all background noise, the noise-cancelling headsets make speech much clearer in noisy environments.

Talk to Plantronics

Supra headsets are just one of a complete range of headsets from Plantronics. If you would like to know more, contact your distributor/dealer. They'll tell you why the world is talking about Plantronics headsets...and into them

Supra®

- **Long-Wearing Comfort.**
With an adjustable headband, lightweight design, and soft ear cushions, the Supra headset is very stable and remarkably comfortable.
- **Freedom of Movement.**
Multitask while talking on the phone. If it becomes necessary for wearers to leave their desks, simply use the Quick Disconnect™ feature without removing the headset, and the other party stays on the line.
- **Sound Quality from the Leaders.**
Plantronics uses a superior voice tube technology and design, with patented SoundGuard®Plus™ and Call Clarity™ technology, which contribute to the Supra headset's excellent sound quality.
