

IntelliTrack

Collect. Track. Manage.

IntelliTrack Stockroom

Overview

IntelliTrack's Stockroom software is designed to be used with portable or fixed station barcode readers to provide a complete turnkey solution to manage your inventory. Stockroom provides efficient tools for inventory, receipt into inventory, routine physical counts, and managing a perpetual inventory. IntelliTrack Stockroom is written in Microsoft® Access and includes the source code should you want to customize it for your specific needs.

The IntelliTrack Stockroom portable software enables the portable barcode reader to collect inventory data automatically. It provides for the collection and storage of user ID, Inventory, locations, and quantities, all with the accuracy, speed, and simplicity of barcodes. The IntelliTrack software includes a ready to run, PC compatible SQL Express data engine to manage all of your inventory data. IntelliTrack includes standard reports, queries, and barcode label printing capabilities.

Stockroom is wireless ready.

RF (WiFi) capability comes with every copy of full version Stockroom software for real time tracking. To utilize wireless features in Intellitrack Stockroom software your portable data collection terminal (PDT), PDA, or handheld computer must have a line-mode capable Telnet client, such as Wavelink, Softogo, or Intermec TE2000. A Telnet client provides terminal emulation allowing your wireless IntelliTrack application to connect to a handheld computer running Windows® CE and Windows Mobile.

Added Features

As part of IntelliTrack's Data Management Solutions, Stockroom is available in a Lite version for smaller inventories. DMS Lite Software allows you to benefit from the full software version for half the cost. Stockroom Lite is limited to 100 items in inventory at a time and does not include wireless features.

Track the cost of your inventory by implementing cost tracking for item receiving. Cost tracking shows the value of your inventory in stock at a given time. Cost tracking options include last cost, average, highest cost, and least cost.

All IntelliTrack products allow concurrent connections meaning, the application can be installed and run on unlimited workstations. The number of workstation licenses purchased limits how many users can be on the system at one time.

Barcode Printing

Integrated barcode printing allows you to label your inventory and locations quickly and easily based on the data contained in your IntelliTrack application. Portable data terminal support and barcode labels maximize data accuracy and efficiency when collecting inventory information.

System Requirements

Component	Requirement
Computer & Processor	2.0 GHz Minimum
Memory	512 MB RAM, 1 GB or higher if running SQL and IntelliTrack software on same computer
Hard Disk	At least 3 GB or higher free disk space available
Drive	CD-ROM or DVD drive
Display	1024x768 or higher resolution monitor
Operating System	<ul style="list-style-type: none">• 32-bit: Microsoft Windows XP Professional with SP 2 or higher, Windows Server 2003 with SP 2 or higher, Windows Server 2003 R2• 32-bit & 64-bit: Windows Vista Home Premium, Vista Business, Vista Ultimate, Windows 7 Home Premium, Windows 7 Professional, Windows 7 Ultimate, Windows Server 2008• 64-bit: Windows Server 2008 R2 SP 1
Batch Mode	<ul style="list-style-type: none">• Internet Information Services (IIS)• Microsoft Active Sync 4.5 on Windows XP, Windows 2003 Server• Mobile Device Center on Windows Vista, Windows 7, and Windows Server 2008• Active network card
Other	SQL 2005, SQL 2005 Express, SQL 2008, SQL 2008 Express With full Microsoft Access: 2007: Office Suite SP 2 2010: 32-bit version only
