Epson's TM-T88 ReStick™ liner-free label printer provides trouble-free printing of repositionable labels with the most reliability available today.

TM-T88 ReStick offers high-speed, liner-free label printing for a wide range of food service, retail and grocery applications at a much lower cost than standard label printers using coated paper liners.

The liner-free, hassle-free label printer that really works

Fast and reliable, the TM-T88 ReStick label printer prints repositionable labels at a crisp 203 x 203 dpi. It supports variable length label output, a variety of paper widths, autocutter and more. Based on new technology, the TM-T88 ReStick printer delivers label printing without the problems associated with traditional linerless label printers. It features a modified paper well to ensure paper movement through the paper path, a modified printhead, additional paper guides and dual support rollers to avoid paper jams.

Ideal for QSR, food service and retail applications

Designed expressly for high-volume food service and retail environments, TM-T88 ReStick prints crisp text and graphics at a fast 5.91"/sec speed. From food bag, coffee and deli labels to price labels, shelf tags and return labels, it is a cost-effective solution for a wide range of labeling applications.

Liner-free, silicone-free labels

Epson's TM-T88 ReStick printer uses cost-effective silicone-free, liner-free MAXStick™ labels that produce 60% more labels per roll than die-cut labels. Adhesive is applied only to the center strip of the label to minimize the negative effects of adhesive material in the printer and enable repositioning of the label multiple times without tearing.

Integration made easy

ReStick supports multiple interfaces including parallel, high-speed USB, Ethernet and 802.11g, and is compatible with best-of-breed and component-based systems. In addition, it is compatible with most TM-T88 series thermal printers and can be used for receipt printing when needed using standard POS paper rolls.

Quality you can rely on

To ensure optimum performance, TM-T88 ReStick has been extensively tested in demanding food service and retail environments and is backed by Epson's two-year limited warranty.
