SECURITY AND TRACEABILITY SOFTWARE

LABEL ARCHIVE

A Security & Traceability Layer for your Label Printing Process.

Whether you need to comply with 21 CFR, WEEE/RoHS, ISO, Sarbanes Oxley or WAL-Mart, TEKLYNX provides you with a complete labeling solution that ensures compliance, so you can have peace of mind.

Label design and printing is an important part of any manufacturing process. Labels contain information about your product, its use and your company. Ensuring that labels have been designed correctly, are properly approved, and that only approved labels enter production is critical.

TEKLYNX' LABEL ARCHIVE software meets these needs by providing a traceability layer for the label design and printing process, complete with archiving, approval, print history and security for label design and production environments. Designed to work with CODESOFT and LABELVIEW label design and printing software, LABEL ARCHIVE addresses the label control standards demanded by several industries, including healthcare, pharmaceutical and manufacturing.

LABEL ARCHIVE extends TEKLYNX' label design and printing functionality by implementing a comprehensive, networked database that provides an enterprise-level traceability and security layer for the entire label design and print process.

Ensure Compliance

LABEL ARCHIVE supports virtually all compliance standards including RFID label standards, WEEE/RoHS, ISO, Sarbanes Oxley, HIPAA, 21 CFR, AIAG, DoD, and the Sunrise Initiative.

LABEL ARCHIVE has the features and functionality to ensure your labeling system is compliant including:

- Centralized architecture
- Enterprise database support (SQL, Oracle, etc)
- Customizable approval rules
- Internet-based approval
- Automatic version control
- History tracking – variable data plus who, what, where, and why
- Watermark (for reprints and test labels)

LABEL ARCHIVE's unique feature set allows you to retain electronic records, provide complete audit trails, require electronic signatures for access and approvals, and limit access by individuals. It provides for security, traceability and version control to meet the needs of 21 CFR compliance and other mandates that require electronic records and electronic signatures.

Add Security

Taken together, Archiving, Approval and History create an unmatched traceability and security layer for bar code and RFID label design and printing.

Security is built in - administrators simply create and maintain user groups and establish permissions while LABEL ARCHIVE takes care of the rest. User privileges can be as limited as Print-Only users.

User Groups

- Administrator
- Designer
- Manager
- Print User

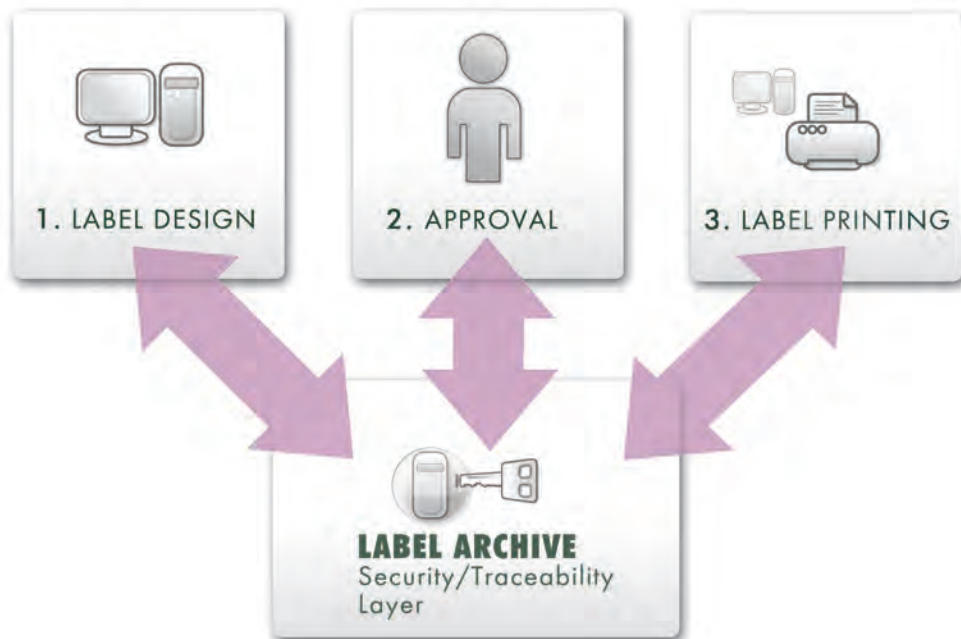

Customize Approval Rules

LABEL ARCHIVE enables multi-stage approval of label designs:

- Only approved labels enter production
- Remote users can be included in the approval process using the Internet or an Intranet
- Instant notification for approving labels through email, SMS, etc.

Approval rules can be customized to meet your business rules or approval processes using up to three tiers of approval.

Secure your label design process in three easy steps:

1 DESIGN

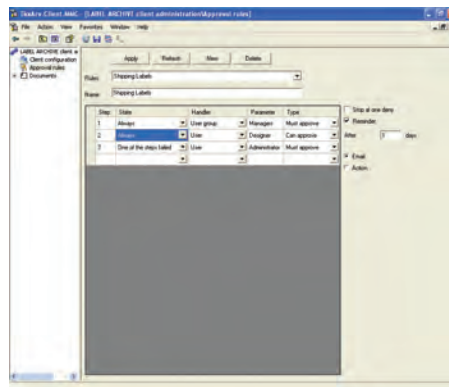

Limit access to design changes.

Only “Designer” level users can checkout, modify and submit proposed template changes.

2 APPROVE

Mandate the use of business rules.

Proposed template changes must be approved based on your business rules.

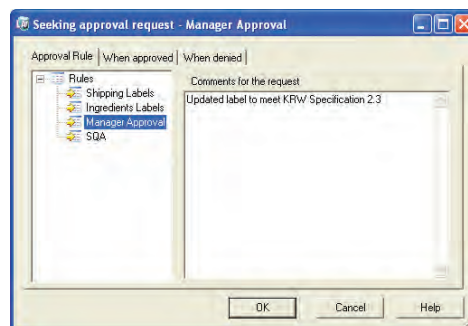

3 PRINT

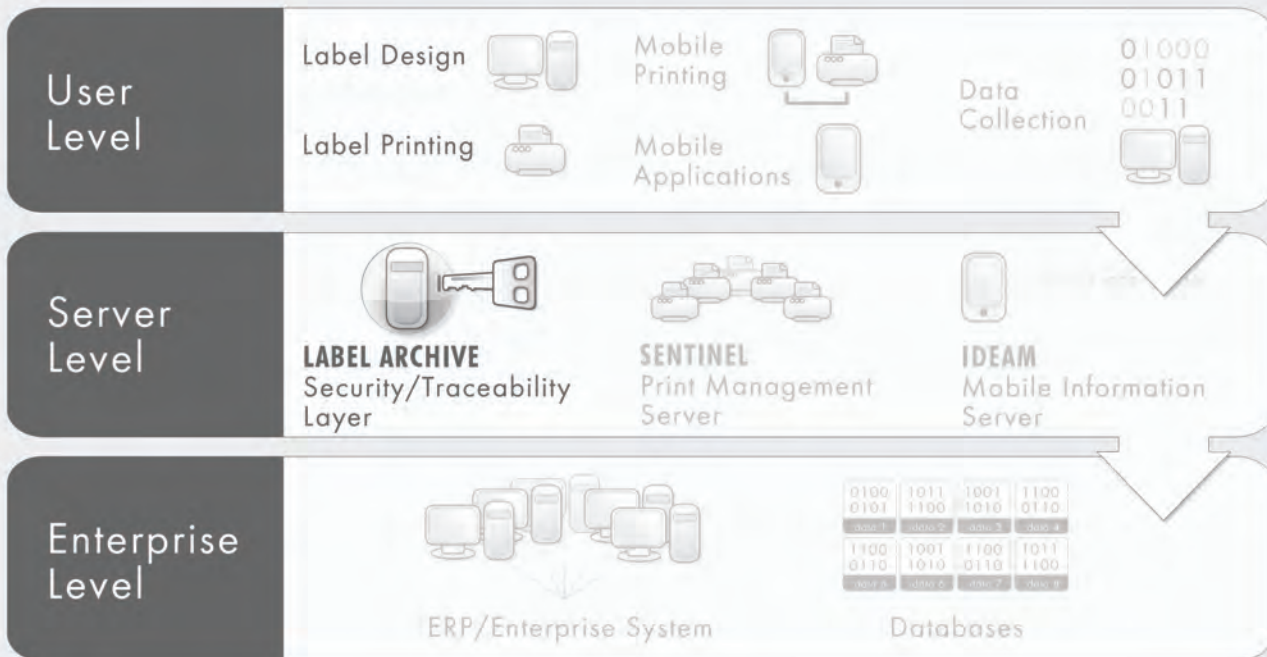

Manage who prints.

Only “Print User” level users can checkout label templates for printing. You can print from:

- Label design software CODESOFT or LABELVIEW
- Print-only software CODESOFT or LABELVIEW
- Customer Applications
- ERP/WMS or any host system print requests processed through SENTINEL.

Secure your labels at the server level.

LABEL ARCHIVE is one part of the TEKLYNX total solution. Compatible with desktop or Enterprise printing solutions like SENTINEL, LABEL ARCHIVE is the ultimate centralized security solution for the label design and printing process.

Global Advantage

TEKLYNX is the world's largest automatic identification and data collection software (AIDC) publisher with truly global product development, technical support, sales and marketing.

TEKLYNX is headquartered in Milwaukee, Wisconsin with European headquarters in Auch, France. Sales and support offices are located in Germany, the Netherlands, Singapore, China, Japan, Mexico and the United States. Development centers are located in Eau Claire, Wisconsin and Auch, France. TEKLYNX is part of an organization that employs more than 6,000 people worldwide.

TEKLYNX is the only AIDC software publisher that has attained Gold Certified status in the Microsoft Partner Program with a competency in ISV/Software and Mobility Solutions, recognizing TEKLYNX' expertise and total impact in the technology marketplace. As a Gold Certified partner, TEKLYNX has demonstrated expertise with Microsoft technologies and proven ability to meet customers' needs.
